

Scholarship offered to meritorious & deserving undergraduate underprivileged students by the JIS Group Educational Initiatives for B Tech Programme

Engineering applicants are on the rise in West Bengal as a result of technical improvement and global market need. This is because of the availability of worthwhile jobs with substantial perks. Engineers, on the other hand, are indispensable to a country's development. The 2024–Indian youths are going places, leaving footprints across the globe in the diverse fields of engineering and technology.

However, not every aspiring student has the financial means to translate their engineering dreams into a promising reality. The West Bengal Joint Entrance Engineering 2024 results are out. Several students who ranked highly come from low income families who do not have the financial means to continue their education, particularly in engineering.

JIS Education Initiatives believes that education can only enlighten individuals through knowledge and ideals. In keeping of such perspective, JIS Education Initiatives awards a special scholarship for outstanding undergraduate engineering students. Students who rank among the first 3000 on the WBJEE merit list will be awarded 100% tuition scholarships in the JIS Group autonomous colleges and JIS University, while those ranked between 3001 and 5000 on the WBJEE merit list will be awarded 70% tuition scholarships in the JIS Group autonomous colleges and JIS University.

This new scholarship award represents JIS Education Initiatives' societal commitment to recognizing merit and advancing education in technology and skill development as a whole. JIS believes that this will inspire more youngsters to pursue engineering as a career.

Eligibility: The student needs to show their WBJEE 2024 rank card at the time of admission in respective colleges to the Admission Cell to obtain the WBJEE 2024 scholarship.
